

WHY RECYCLED PAPER?

Did you know:

At Sealed Air, we take paper sustainability seriously and operate our own paper mills

What this means to you:

This means peace of mind for your business, knowing that you're not just choosing any paper, but paper that makes a real difference.

Our paper mills are certified by the following independent sustainable forest program:

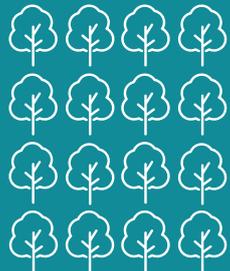

Visit the following website to find out more about this program:
<https://www.sfiprogram.org>

In our paper mills

Raw material inputs are 100% recycled content

Sealed Air's paper manufacturing plants process approximately 45,000 tons of recycled paper per year.

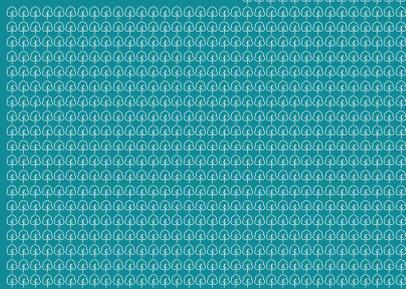

One ton of recycled paper prevents

17
mature trees from being cut down.

This means each year our 2 manufacturing plants save

765,000 trees!

Operations are conducted using a 100% closed loop water system

This means that all water used in the paper production is captured, reclaimed and re-used.

Recycling Loop

Other benefits of recycling 45,000 tons of paper each year:

Saves enough energy to power an average home for **22,500 years** (180,000,000 kwh)

7,884,000 trash bags worth of landfill space saved

Reduces greenhouse gas emissions: **45,000** metric tons carbon equivalent

Saves **1,200,000,000** liters of water which is the equivalent of over 1 billion 1 liter water bottles!

Uses **65%** less water, causes **75%** less air pollution and **35%** less water pollution.

When you choose **Sealed Air paper** you are choosing to conserve our planets natural resources and working with us to leave our planet better than we found it!
